

Data Flow Diagram

Date	26/06/2026
Team ID	Not Assigned
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	2 Marks

Data Flow Diagram

The diagram below shows how data moves through the Rising Waters Flood Prediction System — from the user entering meteorological inputs, through Flask processing, scaling, XGBoost model prediction, and finally returning the flood risk result to the user interface.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data (e.g., User, Flask App).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Scale Input, Generate Prediction).
Rectangle (solid fill, no number)	Data Store	A place where data is stored for use (e.g., floods.save, transform.save, flood dataset.xlsx).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what is being passed.

DFD — Rising Waters Flood Prediction System
